

New Equine Products!

ACVM Registration No's: A11412, A11429 and A11417.

RXVET are excited to announce the launch of three new products to the New Zealand equine market!

Osphos® – An intramuscular bisphosphonate clodronic acid licensed for the alleviation of forelimb lameness associated with bone resorptive processes of the navicular bone in adult horses.

HY-50® – High dose Sodium Hyaluronate in a small volume for the treatment of lameness caused by joint dysfunction associated with non-infectious synovitis.

Somulose® – Combining secobarbital and cinchocaine, Somulose offers a humane, dignified euthanasia and its ease of administration aids user welfare.

These products complement our existing equine range of products including **Equipalazone®**, **Permoxin®** and **F10SC®**.

For more information on this product visit our website at www.rxvet.co.nz, phone us on 0800 4 RXVET (79 838) or contact your RXVET Veterinary Account Manager.
