Zycortal®

The only veterinary registered product in New Zealand to treat Addison's disease.

Zycortal® contains desoxycortone pivalate (DOCP) and is a prolonged-release suspension used as a replacement therapy for mineralocorticoid deficiency in dogs with primary hypoadrenocorticism.

Diagnosis of Addison's disease can be a challenge. But along with greater awareness and effective control with Zycortal®, dogs with this life long disease can go on to live a long and happy life.

Zycortal® is available in a 4ml pack size and administered by subcutaneous injection.
