

Apex Benazepril Oral Solution

Apex Benazepril Oral Solution is indicated for the treatment of Heart Failure in dogs, and Chronic Kidney Disease in dogs and cats. It is the **first** Benazepril solution globally, offering precise dosing delivered straight into the mouth, or on food.

Benazepril (the molecule) treats proteinuria, and reduces systematic and glomerular hypertension. It's proven to also help dogs with heart failure, and cats with CKD live a better life.

Apex Benazepril Oral Solution is:

- ✓ A liquid formulation to allow for precise dosage
- ✓ Sweet flavouring to increase palatability
- ✓ Indicated for use in both cats and dogs

DOSAGE & ADMINISTRATION	<p>For oral administration only. To be given once daily with or without food.</p> <p>Dogs dose: 0.25mg/kg body weight once daily. For dogs with heart failure the dose may be doubled to 0.5mg/kg body weight once daily if required.</p> <p>Cats dose: 0.5mg/kg minimum recommended daily dose.</p> <p>Please see the recommended dosage chart:</p>	Weight (kg)	mL (0.25 mg/kg)	mL (0.5 mg/kg)
